

Basic Policies on Safety, Quality and the Environment

We have established the Basic Policy on Safety, Quality, and the Environment as the items that we prioritize in our business activities in terms of safety, quality, and the environment.

Basic Policies on Safety, Quality, and the Environment

We aim to be a society that can continue to develop and supply safe and high-quality products. In doing so, we will provide products and services that are focused on customers and conduct our business activities with consideration for the environment and in compliance with laws and regulations.

1. We will respond to the needs of our customers by developing, manufacturing and supplying products that can be used safely and with peace of mind.
2. We will strive to protect the environment by conducting business activities to reduce the environmental burden of our products, from development to disposal.
3. We will conduct our business activities in compliance with laws and regulations.
4. We will engage in fair and impartial transactions with our business partners in order to achieve mutual harmony and prosperity.
5. We will respect the human rights of each and every employee and create a safe and secure working environment.
6. We will continue to strive for improvement in order to continuously respond to customer needs and environmental protection.
7. We have set management targets for safety, quality, and the environment for the entire company and for each department, and we are working to achieve these targets.
8. Management policies are communicated throughout the organization, and all executives and employees are united in promoting concrete activities.
